

Title:	Assuria Auditor AutoUpdate #109 released	
Number:	10-13	Date: 28th May 2010

Title **Assuria Auditor AutoUpdate #109 released**

Introduction This update is an Assuria content update. The update is compatible with, and suitable for application to all Assuria Auditor agents.

Contents

Patch Checks After AutoUpdate 110 As part of our continued development of Assuria Auditor, and in response to feedback from our customers, we announced at Assuria Auditor AutoUpdate 104 a change to the way the checks which verify the presence of vendor patches (patch checks) are handled within Assuria Auditor. As previously notified, from the release of AutoUpdate 110, patch checks will be removed from the policies Initial-1, Initial-All, Maintenance-1 and Maintenance-All.

Users wishing to execute the patch checks should do so by running the policy PatchChecks.

In Assuria Bulletin 10-02 we advised that, from AU 104, an Assuria Auditor policy, PatchChecks, is issued for all supported platforms. The PatchChecks policy only contains the patch checks relevant to the platform on which it is running. The PatchChecks policy should be run regularly and after the application of the Assuria AutoUpdate each month. Initial-1, Initial-All, Maintenance-1 and Maintenance-All policies continue to contain the Patch Checks up to Assuria AutoUpdate 110 to allow users to implement any changes to their own procedures. Please see Assuria Technical Note 18 for more information.

Solaris zone support The Assuria Auditor agent has been enhanced to fully work with Solaris zones.

In addition to identifying and working in global, sparse root and whole root zones, a Virtual Machine Baseline (vmconfig baseline) has been added to monitor new and removed zones as well as changes to the Solaris operating system version in an existing zone, it's IP address and base path.

Other Changes Minor changes to logos and product branding have been made to the context sensitive help system.

The Release Note (rain.txt) has been superceded.
