

Title: Assuria Auditor AutoUpdate #110 released
Number: 10-14 Date: 30th June 2010

Title Assuria Auditor AutoUpdate #110 released

Introduction This update is an Assuria content update. The update is compatible with, and suitable for application to all Assuria Auditor agents.

Contents

Running Patch Checks As part of our continued development of Assuria Auditor, and in response to feedback from our customers, we announced at Assuria Auditor AutoUpdate 104 a change to the way the checks which verify the presence of vendor patches (patch checks) are handled within Assuria Auditor. As previously notified, from the release of AutoUpdate 110, patch checks have now been removed from the policies Initial-1, Initial-All, Maintenance-1 and Maintenance-All.

Users wishing to execute the patch checks should do so by running the policy PatchChecks.

In Assuria Bulletin 10-02 we advised that, from AU 104, an Assuria Auditor policy, PatchChecks, is issued for all supported platforms. The PatchChecks policy only contains the patch checks relevant to the platform on which it is running. The PatchChecks policy should be run regularly and after the application of the Assuria AutoUpdate each month. Initial-1, Initial-All, Maintenance-1 and Maintenance-All policies continue to contain the Patch Checks up to Assuria AutoUpdate 110 to allow users to implement any changes to their own procedures. Please see Assuria Technical Note 18 for more information.

Assuria Auditor Group Manager update

The update contains a new version of 'S2Manager.exe', the Assuria Auditor Group Manager that is shipped with Assuria Auditor for backward compatibility reasons. This fixes a known incompatibility with SQL Server 2005 or later, and completes the rebranding of this component.

Please Note: This AutoUpdate applies changes to Assuria Auditor Group Manager and therefore Assuria Auditor Group Manager users **should only apply this update using** the AutoUpdate program from *Program Files/Assuria/Assuria_Auditor 4.2.8 Console/AutoUpdate* and **NOT** the *Xpress update* option on the Maintenance Menu in Group Manager.

Use of the Group Manager *Xpress update* option to apply this update #110 will result in an Error 207.
