Contents

VMware Security Advisories Checks are provided for a subset of the published and applicable VMware Security Advisories for VMware ESX 3. This is part of an ongoing release of checks for all such advisories, which will be undertaken over the next AutoUpdates.

VMware ESX On VMware ESX 3.5 password cracking has been moved out of the Initial and Maintenance policies and resides in the password policy.

Other changes On all UNIX systems for the check 'user-homedir-gw', the wording in implications has been changed to ensure users look at the directories ACL entries if the check is reporting a directory to be group writable and the command 'ls' is not.

Enhancements have been made to the console scripts 'genreport' and 'genCSVreport' to better handle database interaction after a problem run.
